Summary

Aspiring Electronics Engineer focused on VLSI design, Verilog-based systems, and AI-driven applications. Experienced in building ML, IoT, and hardware-integrated solutions, with strong problem-solving ability and interest in semiconductor technologies.

Education

B.E Electronics and Communication Engineering	2024–2028
PSG Institute of Technology and Applied Research	CGPA: 9.19
Grade 12 - SSM Lakshmi Ammal Matric Higher School	95.5%
Grade 10 - SSM Lakshmi Ammal Matric Higher School	97%

Skills

Languages: C, C++, Python

Tools: MS Excel, PowerPoint, Canva, LaTeX

Core: Verilog (learning), IoT and ML Basics

Soft Skills: Communication, Teamwork, Leadership

Projects

- **Bias Mirror (Qualcomm Edge AI Hackathon)**
Developed ML-based bias detection system using Random Forest and CatBoost with fairness evaluation techniques.
- **Fingerprint Voting System**
Developed a biometric-based voting system using fingerprint authentication to ensure voter uniqueness and eliminate fraud.
- **NeuroVisionAI**
Built AI-based vision system using deep learning for intelligent image interpretation.
- **Driving With Wind – EV Innovations (Itech Ideathon 2025)**
Designed an EV concept integrating wind energy harvesting to improve energy efficiency and extend battery performance.
- **Smart IoT Systems**
Designed and implemented an IoT-based water level detection system using sensors for real-time monitoring and efficient water management.

Achievements

- Finalist – Qualcomm Edge AI Hackathon 2025
- Finalist – Itech Ideathon 2025
- Finalist – Code'O Clock 24hr Hackathon
- Semi-Finalist – Caterpillar Tech Challenge 2026 (Ongoing)

Leadership

- Program Manager – FESTO (FATC)
- Joint Secretary – Dance Club
- Editor – Multimedia Team (SU)

Coursework

- Python (ADPP)
- Digital Circuits (NPTEL)
- AI & ML (NPTEL)
- VLSI (Smarterd) Status – Ongoing
- Verilog (Udemy) Status – Ongoing
